

# North Nibley Pre-school: Outbreak Management Plan

(v5 9 March 2022)

## Statement of Intent

North Nibley Pre-school's Outbreak Management Plan (OMP) details the way in which the setting will work with partners, eg. local authority, UK Health Security Agency (UKHSA)<sup>1</sup>, DfE<sup>2</sup>, to contain and manage an outbreak of COVID-19 at the setting. In light of the regularly changing national and local position, it will be necessary for this plan to be reviewed and updated as and when necessary.

## Local impact of COVID-19

Gloucestershire's first cases of COVID-19 were confirmed on 28 February 2020. The county has experienced outbreaks in the community in Gloucestershire. Predominantly these have occurred in care home settings, however other settings including education, healthcare and workplaces have also seen significant numbers of outbreaks. Fortunately, during 2020-21 Pre-school year no cases were identified with any child on the register. The setting experienced its first closure due to COVID-19 in the Autumn 2021 term, due to a member of staff contracting the virus, with a second closure in the Spring 2022 term due to the inability to maintain legal staff to child ratios.

## Purpose of the OMP

This OMP provides the setting, and parents/carers, with details of systems to prevent, detect and manage outbreaks of COVID-19 at the setting. The Pre-school's OMP will be triggered where there is an incident (see section entitled "*responding to outbreaks*"), cluster or outbreak of COVID-19 at the setting or in the locality.

## Functions

The OMP has three main functions:

1. *Prevent COVID-19*: the Pre-school Committee and Lead Practitioner will ensure that prevention measures are in place to keep staff and children as safe as possible.
2. *Contain COVID-19*: NHS Test and Trace and the setting
3. *Responding to outbreaks*: the OMP outlines how the setting will respond to an outbreak.

## Supporting plans

Pre-school's COVID-19 action plan – updated at least once a term<sup>3</sup> by the Administrator - is a reference document for the Committee and staff.

## Responsibility of the Setting

North Nibley Pre-school are responsible for the following:

- safeguarding - local agencies, services and the setting will work together to actively look for signs of harm given the greater risk of harm that some children may have been exposed to through COVID-19;
- supporting children's learning, development and wellbeing – we will continue to follow the early years foundation stage (EYFS) statutory framework; and
- supporting vulnerable children.

## Prevent COVID-19

North Nibley Pre-school will adhere to the following control measures:

- Ensure good hygiene for everyone
  - *Frequent and thorough hand cleaning* This regime is in place and has been since the Pre-school returned to operation after the first lockdown in June 2020. It will continue to be used for the foreseeable future.
  - *Respiratory hygiene* We adhere to the 'catch it, bin it, kill it' approach and have always done so. This will continue.
  - *Use of personal protective equipment (PPE)* As an early years setting we are not required to use PPE on a daily basis. However, should a child become ill with COVID-19 symptoms

---

<sup>1</sup> Previously known as Public Health England (PHE)

<sup>2</sup> Department for Education (DfE)

<sup>3</sup> ie. Autumn (Term 1 & 2)/Spring (Term 3& 4)/Summer (Term 5 & 6)

then the member of staff looking after them will use such equipment until the child's parent/carer arrives to collect them from the setting.

- *Maintain appropriate cleaning regimes* We are rigorous in ensuring all surfaces and toys (used during a session) are cleaned daily. Particular focus is on frequently touched surfaces which are cleaned on a regular basis throughout the day. We follow the PHE guidance on the cleaning of non-healthcare settings.
- Keep occupied spaces well ventilated
  - When North Nibley Pre-school is in operation, we will ensure that the Main Hall of North Nibley Village Hall is well ventilated and that a comfortable environment is maintained. Our risk assessment, undertaken regularly, will identify any poorly ventilated spaces and we will take steps to improve fresh air flow in these areas. We will give particular consideration when holding events where visitors such as parents are on site. Where it is safe to do so, we open external windows to improve natural ventilation. In addition, the setting's external door to the outside, fenced, area will be opened. We will endeavour to balance the need for increased ventilation while maintaining a comfortable temperature.
- Follow public health advice on testing, self-isolation and managing confirmed cases of COVID-19
  - *When an individual develops COVID-19 symptoms or has a positive test* Children, staff and other adults should follow public health advice on when to self-isolate and what to do. They should not come into the setting if they have symptoms or other reasons requiring them to stay at home due to the risk of them passing on COVID-19 (for example, they are required to quarantine).
  - *If anyone in at the setting develops symptoms of COVID-19* However mild, we will send the child or member of staff home and we expect them to follow public health advice. If a child is awaiting collection, appropriate PPE will be used as necessary. Any rooms that have been use will be cleaned after the child has left. The child should not return to the setting until they are well enough.

### *Contain COVID-19*

#### (a) Possible symptoms

In this scenario pre-school children are requested to stay at home and take a Polymerase Chain Reaction (PCR) test, informing the setting of the outcome.

If no test is taken but COVID-19 is suspected and the parent/carer insists that the child attends the setting, then North Nibley Pre-school can refuse the child for the period where they may be infectious to others (ie. 10 full days from symptom onset or unwell).

If the PCR test is negative, then the child can return to the setting once they are well and at least 24 hours fever free without medication.

#### (b) Confirmed case (Lateral Flow Device (LFD) or PCR)

The pre-school child will need to isolate until well (ie. at least 24 hours fever free without medication). This will either be:

- 10 full days of isolation have passed; or
- produced a negative LFD on 2 consecutive days with the first taken no earlier than day 5 of isolation.

If we have several confirmed cases within 10 days<sup>4</sup>, we may have an outbreak. If this is the case we will call the dedicated advice service<sup>5</sup> who will escalate the issue to our local health protection team where necessary who will advise if any additional action is required, such as implementing elements of our OMP and/or temporarily reintroducing some control measures.

If a child or member of staff is admitted to hospital with COVID-19, we will seek public health advice immediately.

---

<sup>4</sup> Threshold is 2 children and/or staff

### *Responding to outbreaks*

Close contacts who are double vaccinated or those under 18 will not need to self-isolate.

- Children who live with someone with COVID-19 should still attend the setting as normal unless they develop symptoms or test positive.
  - Staff who live with someone who has COVID-19 should work from home where they can. If unable to work from home, they can continue to attend work in line with guidance.
  - If an child/member of staff has one of the 3 main symptoms of COVID-19 (alpha, delta or omicron variant), then they need to take a PCR test and self-isolate until they receive the results.
  - Standard self-isolation period is 10 full days. However, this can be reduced if a negative LFD is taken on 2 consecutive days with the first taken no earlier than day 5 of isolation.
  - All LFD results should be reported via the online facility (click link [here](#))
  - If symptomatic, especially with a high temperature, you should remain in isolation until 24 hours has elapsed since being clear of symptoms.
- **Staff:** All our staff are double vaccinated and some have also received the booster. Should they display symptoms at the setting they will be sent home immediately and advised to take a Lateral Flow Device (LFD) test. We will inform parent/carers if their child has had prolonged contact with the member of staff. If the absence of the member of staff means that we will fall below the required EYFS staff to child ratio, we will enact Policy 39 Emergency closure.
    - *Negative LFD result:* the member of staff can return to the setting as soon as they feel well enough.
    - *Negative LFD result but feels unwell:* the member of staff will continue to self-isolate and organise a PCR test.
    - *Positive LFD result:* the member of staff will self-isolate immediately. Standard self-isolation period is 10 full days. However, this period can be reduced if a negative LFD is taken on 2 consecutive days with the first taken no earlier than day 5 of isolation.
    - *Positive PCR result:* the member of staff will continue to self-isolate. Standard self-isolation period is 10 full days. However, this period can be reduced if a negative LFD is taken on 2 consecutive days with the first taken no earlier than day 5 of isolation.

In all cases the member of staff will keep the setting informed.

- **Children:** should a child display symptoms at the setting, we will contact their parent/carer and ask them to pick the child up immediately. We will isolate the child from the rest of the setting, allocating a member of staff for them – the member of staff will wear PPE. Once the child has been picked up the allocated member of staff will clean down the area they and child have been using.

If a child has a positive result from a LFD they should self-isolate. Their parent/carer must notify the setting that they will not be attending setting on the basis of the LFD test result. An LFD test must be taken on 2 consecutive days, no earlier than day 5. If both are negative and the child is well enough (ie. fever free without medication), then they can return to the setting. However, if one or both are positive, then the child must continue to isolate and cannot return to the setting until they have two negative tests on consecutive days. The parent/carer must keep the setting informed.

If the confirmatory PCR test is positive (or is taken more than two days after the LFD), the child must self-isolate until 10 days after the date of the LFD test (or the date their symptoms began, if they were symptomatic). The child's parent/carer must inform the setting that they have had a positive PCR test result and will not be attending the setting for the period of their isolation. North Nibley Pre-school will supply the parent/carer with activities they can do with their child during this period.

**Staff and children, ie. their parent/carer, are required to report the test result via the [NHS Online reporting system](#) for both negative, void and positive test results. They should also report positive, negative and void results to the setting.**

North Nibley Pre-school will not provide any personal information if asked to by parents and/or close contacts that would be a breach of GDPR or data protection legislation.

- *Stroud Valley/Gloucestershire:*

If there have been several positive cases at North Nibley Pre-school in a 10-day period<sup>6</sup>, we will call the dedicated advice service who will escalate the issue to our local health protection team where necessary and advise if any additional action is required, such as implementing elements of our OMP.

*Threshold reached*

If the threshold is reached, North Nibley Pre-school will consider:

- whether more activities can take place outdoors;
- ways to improve ventilation indoors, where this would not impact on comfort;
- one-off enhanced cleaning focussing on touching points and any shared equipment;
- review and reinforcement of hygiene measures;
- review parental/visitor attendance in the setting.

In exceptional circumstances, the setting may be contacted if deemed necessary by local health protection teams in response to a local outbreak, as currently happens in managing other infectious diseases.

If North Nibley Pre-school is advised to limit attendance, eg. only offer places to vulnerable children and those of critical workers, the setting will advise parents/carers as soon as possible. In the event that the setting has to close, then policy 3.9 Emergency Closure will be followed. If this is the case, the setting will endeavour to furnish parents/carers with suggested activities to assist them in occupying their child whilst at home.

NB: Fully vaccinated people should still adhere to all the IPC measures of:

*hands space fresh air*
